INTRODUCTION

Team Solutions is a privately owned company established in 1996 with a mission to provide a one-stop water treatment service to its customers.

Our relatively young but progressive company offers a comprehensive standard line of products including water filter plants, reverse osmosis systems, softeners, wastewater plants and water treatment chemicals. Our emphasis, however, is to design and develop systems keeping in mind the local environment and the specific requirements of our customers.

TEAM Solutions' staff includes highly specialized engineers (chemical and mechanical engineers) and professionals who understand and can meet the needs of highly technical industries.

Our integrated & responsive team assesses each customer's need with the help of the most modern technology, sophisticated computer based design and analysis software and in-house laboratory testing. This input, coupled with our experience, enables us to provide optimal solutions for varied applications.

We have Technical collaboration with various international companies, leaders in their own areas of water treatment processes. This technical support helps us offer our clients, up-to-date solutions, cost effective and quality products and reliable supply of components.

In addition to our technical expertise and quality-engineered products, key to our success also lies in our commitment to accurate and timely quotations, on time delivery and prompt service.
