## RF Cages for MRI Systems

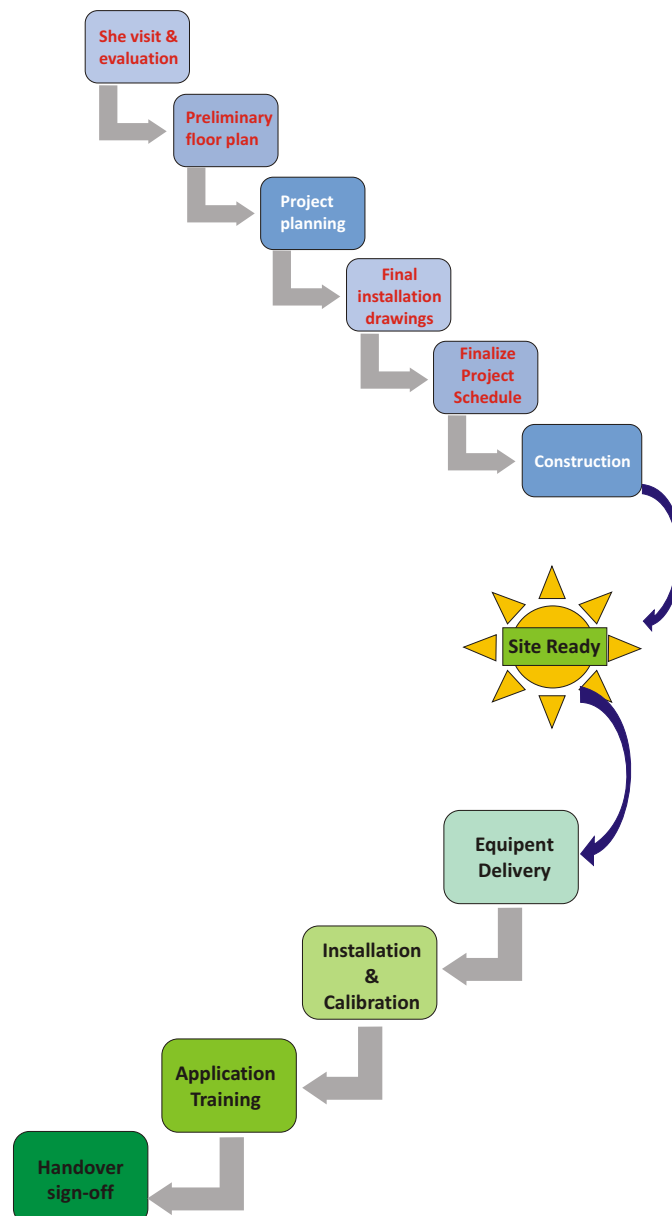

TEAM SOLUTIONS is pleased to announce that we have acquired the competency of building RF Cages for MRI systems. Quality RF shielding is required for artifact free imaging which serves the backbone of any imaging department. We deliver quality RF Cages built from imported material and professional workmanship.

## PROJECT MANAGEMENT

Under the leadership and guidance of a certified PMP project manager, the company offers complete project management from sales order review to equipment handover. Our dedicated project manager will help our client through all stages of the project ensuring transparency and completion within time, scope and budget.

### PROJECT PROCESS FLOW

## CONSULTANCY

We provide consultancy in the following fields;

- a) **Project Management:** Our expert certified project manager will guide the relevant healthcare provider with all aspects of diagnostic equipment project planning through all stages of projects to make sure the projects get completed within time, scope and budget.
- b) **Site preparations:** Having completed numerous projects of varying complexities and covering wide range of modalities like MRI, CT, PET/CT, X-Ray, NM and Cath Labs, we will help the Imaging department to prepare sites with recommended preinstallation requirements.
- c) **Equipment Installations:** We will provide advice on what to expect from vendors with respect to imaging equipment installations, clinical Training and acceptance criteria.
